3 & 4. Competency Assessment & Evidence Classification

*ECCE classifies evidence strictly based on extracted resume passages. **Evidence Not Found** must not be interpreted as proof that the candidate lacks the skill. **Potential Inconsistency** is flagged for human review, not treated as proof of dishonesty.*

Skill	Type	Classification	Detected Actions & Project Context	Assessment Notes
Python	Required	**Evidence Found**	**Actions:** Developed **Context:** Backend	Verified supporting context with active project application.
AWS	Required	**Evidence Found**	**Actions:** Orchestrated **Context:** Cloud	Verified supporting context with active project application.

6. Scoring Explanation & Role Gap Analysis

Evaluator Summary: Verified 4/4 required competencies with contextual evidence. Experience: Exceeds Requirement (11.0y vs 4.0y req).

7. Counterfactual Score Simulations (Hypothetical Analysis)

NOTICE: The following simulations represent hypothetical mathematical sensitivity models under the deterministic scoring function. They illustrate how specific changes in verified qualifications or resume parsing clarification would affect the matching score. These are hypothetical models, not actual results or awarded points. Candidates must never add skills they do not genuinely possess.

Scenario	Type	Baseline	Hypothetical	Impact / Explanation
Preferred Skill Acquisition: Terraform	Preferred Skill Acquisition	86.84%	**91.84%** (+5.00%)	Candidate demonstrates complementary competence in preferred skill Terraform. *Hypothetical Simulation - Not Actual Result*

8. Candidate Skill-Gap Guidance & Practical Next Steps

[PRIVATE TO CANDIDATE] The following development recommendations are provided exclusively to assist the candidate in closing identified capability gaps. These recommendations are kept strictly private and are not disclosed

to recruiters.

Skill Gap	Relevance to Job Role	Recommended Practical Project	Authoritative Resource
Terraform (Preferred)	Key technical capability specified in the job requisitions for preferred qualifications.	Build a practical proof-of-concept project demonstrating production usage of Terraform.	Official documentation and industry-standard tutorials for Terraform.

Data Distinction Standard: Verified inputs include job descriptions, candidate submitted files, and deterministic score formulas. Resume claims reflect candidate-supplied text. Contextual models classify evidence. Counterfactual simulations are strictly hypothetical.
